Occupational Health Infection Control Requirements
for 2012 Arts in Healthcare Summer Intensive

All individuals participating in clinical experiences must bring the following information/documentation upon arrival to the Intensive:

- **Chickenpox**
  - Volunteer must provide serological (lab) proof of immunity with varicella IgG.
  - If lab test shows no immunity, volunteer will need to be immunized with two doses of varicella vaccine given 8 weeks apart.

- **Tuberculosis surveillance**
  - Proof of a negative tuberculosis skin test (PPD) within the past 12 months.
  - If volunteer has history of previous positive PPD, then will need to bring report of negative chest x-ray and documentation of treatment given for TB infection.

- **Measles (rubeola) and German measles (rubella)**
  - Documentation of two MMRs or
  - Documentation of one live measles (rubeola) vaccine given on/after 1968 AND one MMR.
  - Documentation of serological proof of immunity

Students of any university can typically obtain a copy of childhood immunization records from the university infirmary. UF students can get records from the infirmary on main campus or in the infirmary satellite office on the second floor of the Dental Sciences Building at Shands Hospital.

Please note: Participants are responsible for obtaining all necessary records and immunizations prior to beginning the Intensive on July 9, 2012. Please contact Jill Sonke at jsonke@ufl.edu with questions or concerns.
