Arts in Healthcare for Rural Communities is a multi-year project of the Arts in Medicine Programs at the University of Florida: the UF Center for Arts in Medicine and Shands Arts in Medicine, supported by the State of Florida Division of Cultural Affairs, the National Endowment of the Arts, and the Kresge Foundation, designed to create a working model for arts in healthcare programs in rural communities. The overarching goals of the project are: to bring the arts and creative opportunities to as many people as possible in a way that enhances individual and community health and health literacy, to provide access to the arts and to build arts participation in the Florida Panhandle by exposing diverse healthcare communities to creative opportunities in the healthcare setting, and to develop, assess, and disseminate a model for the integration of the arts into healthcare in rural hospitals and communities. The following needs assessments were conducted by the Center for Arts in Medicine to inform the development of arts in healthcare programs in six rural Florida counties.

Located along the Gulf Coast, Walton County is a rural community that has been adversely affected by severe or chronic economic distress. As of the census of 2000, there were 40,601 people, 16,548 households, and 11,120 families residing in the county. The population density was 38 people per square mile (15/km²). There were 29,083 housing units at an average density of 28 per square mile (11/km²). The racial makeup of the county was 88.41% White, 6.98% Black or African American, 1.28% Native American, 0.45% Asian, 0.04% Pacific Islander, 0.75% from other races, and 2.09% from two or more races. 2.17% of the population was Hispanic or Latino of any race.

In the county the population was spread out with 21.70% under the age of 18, 7.10% from 18 to 24, 28.50% from 25 to 44, 26.90% from 45 to 64, and 15.80% who were 65 years of age or older. The median age was 40 years. For every 100 females there were 105.20 males. For every 100 females age 18 and over, there were 105.00 males.

The median income for a household in the county was $32,407, and the median income for a family was $37,663. Males had a median income of $26,799 versus $21,208 for females. The per capita income for the county was $18,198. About 11.60% of families and 14.40% of the population were below the poverty line, including 21.00% of those under age 18 and 10.90% of those ages 65 or over.

Walton County – Chronic Disease Profile 2007-09

Source: Florida Charts www.floridacharts.com

Source: Florida charts www.floridacharts.com
Walton County is home to 15 named coastal dune lakes along 26 miles of coastline. These lakes are a unique geographical feature and are only found in Madagascar, Australia, New Zealand, Oregon, and here in Walton County. The county is also home to the highest natural point in Florida: Britton Hill, at 345 feet.

Beaches of South Walton's 26 miles of shoreline have been certified as "Blue Wave" beaches, a national designation given by the Clean Beaches Council. To be certified the beaches passed 65 tests that identified them as well-managed, clean and protected. South Walton is the only destination in the country to have 26 continuous miles of beaches certified Blue Wave.

Located along the Gulf Coast, Wakulla County is located in the panhandle of Florida. As of the 2000 census, the population was 28,212 people. Its county seat is Crawfordville. The racial makeup of the county was 86.10% White, 11.51% Black or African American, 0.59% Native American, 0.25% Asian, 0.03% Pacific Islander, 0.29% from other races, and 1.23% from two or more races. 1.94% of the population were Hispanic or Latino of any race. In the county the population was spread out with 25.60% under the age of 18, 7.60% from 18 to 24, 31.70% from 25 to 44, 24.70% from 45 to 64, and 10.30% who were 65 years of age or older. The median age was 37 years.

In 2009, the median income for a household in the county was $48,022. About 14.1% persons were below the poverty line versus 15.0% in the state. Wakulla County however, is designated as one of eight counties in the Northwest Florida Rural Area of Critical Economic Concern (RACEC). These counties, (Calhoun, Franklin, Gadsden, Gulf, Jackson, Holmes, Liberty and Washington, as well as, the area within the City of Freeport also known as “Opportunity Florida”), are regions comprised of rural communities that have been adversely affected by severe or chronic economic distress, extraordinary economic events, or natural disasters. The designation provides additional tools for Wakulla County to be proactive in economic development such as greater grant opportunities, lower grant match requirements, and priority eligibility for certain transportation programs to name a few. The County began pursuing the designation approximately a year ago as a team effort with the Small County Coalition, local Legislators, and the Governor’s Office. The designation further solidifies the regional partnership with the coastal counties while simultaneously furthering job creation.

Wakulla County was created from Leon County in 1843. It may (although this is disputed) be named for the Timucuan Indian word for "spring of water" or "mysterious water." This is in reference to Wakulla County’s greatest natural attraction, Wakulla Springs, which is one of the world’s largest freshwater springs, both in terms of depth and water flow. In 1974, the water flow was measured at 1.23 billion US gallons (4,700,000 m3) per day—the greatest recorded flow ever for a single spring. Another possible origin for the name Wakulla, not as widely accepted, is that it means "mist" or "misting", perhaps in reference to the Wakulla Volcano, a 19th century phenomenon in which a column of smoke could be seen emerging from the swamp for miles.

The town of Port Leon was once a thriving cotton-shipping hub, with a railroad that carried over 50,000 tons of cotton a year to be put on ships, usually for shipment direct to Europe. Port Leon was the sixth-largest town in Florida, with 1,500 residents. However, a hurricane and the accompanying storm surge wiped out the entire town. New Port (today known as Newport) was built two miles (3 km) upstream but never quite achieved the prosperity of Port Leon.

Wakulla County stands out in one statistical category: there is a near-absence of any municipal population in this county of perhaps 27,000. Two tiny municipalities hold maybe 3 percent of the population. The county seat, Crawfordville, is the only unincorporated county seat among Florida’s 67 counties, and, lying only 20 miles (32 km) from Tallahassee, that district has grown dramatically in recent years to an extraordinarily large and dense population for a "rural" place not touching or having any continuity with any incorporated town. The Crawfordville population center may now have 12-18,000 inhabitants in 10-20 square miles.

In Gloria Jahoda’s book, *The Other Florida*, she writes movingly of the extreme poverty of Wakulla County from the early 1900s to 1966, when Wakulla still had no doctor and no dentist, few stores and a county newspaper produced just once a month on a mimeograph machine. Today, Wakulla has several doctors and dentists, several supermarkets and big-box retailers, a golf resort and a seafood business.

Belle Glade Needs Assessment

Belle Glade is a city in Palm Beach County, Florida on the southeastern shore of Lake Okeechobee. It (and the surrounding area) is sometimes referred to as "Muck City" due to the large quantity of muck, in which sugarcane grows, found in the area. About half the sugarcane in the nation is grown in the plains around Belle Glade and nearby Clewiston. For a time during the early to mid-1980s, the city had the highest rate of AIDS infection per capita (37 cases in a population of roughly 19,000) in the United States. According to the FBI in 2003 the city had the second highest violent crime rate in the country at 298 per 10,000 residents.

As of the census of 2000, there were 14,906 people, 4,854 households, and 3,431 families residing in the city. The population density was 3,206.2 inhabitants per square mile (1,237.7/km²). There were 5,374 housing units at an average density of 1,155.9 per square mile (446.2/km²). The racial makeup of the city was 13.8% White (non-Hispanic), 50.68% Black or African American, 27.57% Hispanic or Latino of any race, 0.17% Native American, 0.19% Asian, 0.04% Pacific Islander, 9.70% from other races, and 8.93% from two or more races.

There were 4,854 households out of which 39.0% had children under the age of 18 living with them, 40.9% were married couples living together, 22.0% had a female householder with no husband present, and 29.3% were non-families. 23.3% of all households were made up of individuals and 6.1% had someone living alone who was 65 years of age or older. The average household size was 3.04 and the average family size was 3.62. In the city the population was spread out with 33.5% under the age of 18, 10.0% from 18 to 24, 27.1% from 25 to 44, 20.7% from 45 to 64, and 8.7% who were 65 years of age or older. The median age was 30 years. For every 100 females there were 103.5 males. For every 100 females age 18 and over, there were 102.6 males.

The median income for a household in the city was $22,715, and the median income for a family was $26,756. Males had a median income of $26,232 versus $21,410 for females. The per capita income for the city was $11,159. About 28.5% of families and 32.9% of the population were below the poverty line, including 41.1% of those under age 18 and 21.4% of those age 65 or over.

As of 2000, speakers of English as a first language accounted for 61.03% of all residents, while Spanish as a mother tongue consisted of 26.87%, Haitian Creole comprised 11.00%, and French made up 1.07% of the population. As of 2000, Belle Glade had the tenth highest percentage of Haitian residents in the United States, at 11.50% of the populace. It also had the sixtieth highest percentage of Cuban residents nationally, at 5.98% of the population.

Belle Glade is the largest city on the southern rim of Lake Okeechobee. The city's motto is “Her soil is her fortune,” the same soil that rose from the swamplands to create other communities, most of which did not endure. On Torry Island, now part of Belle Glade, the state’s last manually operated swing bridge crosses the Rim Canal inside the Herbert Hoover Dike.

Belle Glade is proud of the Dolly Hand Cultural Arts Center located at Palm Beach Community College Glades Campus. The art center is named after Dolly Hand, a pioneer and Champion of the Glades. The DHCAC’s typical season presents play productions, music of all genres and ballets. Many celebrities have performed at the Center.

The Belle Glade culture, or Okeechobee culture, is an archaeological culture that existed from as early as 1000 BCE until about 1700 in the area surrounding Lake Okeechobee and in the Kissimmee River valley in the U.S. state of Florida.

Major archaeological sites of the Belle Glade culture include Belle Glade, Big Mound City, the Boynton Mound complex, Fort Center, Ortona and Tony's Mound. Analysis of the two sites was published by Gordon Willey in 1948. The best known site, Fort Center, was the subject of major excavations under the direction of William Sears during the 1970s. Other sites are known from test excavations and/or aerial surveys.

Zora Neale Hurston was in Belle Glade while writing Their Eyes Were Watching God. She was befriended by Sarah Lee Creech, who created the first anatomically correct dolls for African Americans, modeled after Belle Glade children.

Source: http://www.pbchistoryonline.org/page/belle-glade
"Okeechobee" (pronounced slowly, with long vowel sounds throughout) is a Seminole word meaning “Big Water”. An appropriate name for the second largest fresh water lake in the United States. The lake covers an area of nearly half a million acres. The lake is part of the Okeechobee Waterway, which runs from Ft. Myers on Florida's west coast, up through Caloosahatchee, past Moore Haven through the Lake, and via the St. Lucie canal, to Stuart on the east coast of Florida. Okeechobee County is one of the many counties which border the lake.

The City of Okeechobee is the only incorporated area within Okeechobee County. The city has approximately 6,000 residents and an additional 34,000 people live in the county.

Immokalee has long been recognized as a distinct community within Collier County. Immokalee's economy, geography, and demographic make-up are different than the rest of Collier County.

Approximately one-half of the land within the Immokalee Urban Area is presently zoned and actively used for agriculture. The urban area is surrounded by productive crop lands and environmentally significant habitat. Most Immokalee residents work within the agricultural industry, and the majority of agricultural laborers originate from Mexico and Central America. Statistics from the 2000 Census (the most comprehensive data for Immokalee currently available), comparing Immokalee to the County as a whole, reflect some of the key socio-economic differences, including age distribution, race and ethnicity, income, education and housing.

Demographics

- **Total population in Immokalee:** 19,763

- **Race:**
  - 38.5 percent white (nationally 75.1%)
  - 18 percent black (nationally 12.3%)
  - 71 percent Hispanic (nationally 12.5%)

**Process Statement:** This information was compiled through online research and community networking by the Center for Arts in Healthcare, Research and Education.
Jackson County is located in northwest Florida, bordering Alabama and Georgia. It includes 11 incorporated and three unincorporated municipalities and is predominantly rural. The county is one of Florida’s Rural Areas of Critical Economic Concern (RACEC), indicating the need for development and economic growth. Primary industries are transportation, trade, and utilities, with government and service industries employing the largest percent of the population(). Agriculture, natural resources and mining are also major industries, and Jackson is the state’s leading producer of soybeans and peanuts (). In accordance with a strongly agrarian culture, there is a seasonal farmer’s market in Marianna, the county seat. However, the benefits of access to the market are reserved for residents of Marianna or those with transportation to the market, conceivably excluding low income, rural residents. According to MATCH (Mobilizing Action Towards Community Health), a collaborative project between the University of Wisconsin and the Robert Wood Johnson Foundation, the county is ranked 51 out 67 Florida counties for overall health (Footnote? this considers health outcomes and health factors, including health behaviors, clinical care and environment) (). Lack of physical activity, poor nutrition, and access to care (as a result of economic, geographic or cultural barriers) are some of the major risk behaviors that contribute to the county’s overall poor health (). The Jackson County Health Department has three main programs aimed at addressing community health issues; the Healthy Communities, Healthy People program focuses on adult nutrition and physical activity, Closing the Gap concentrates on reducing health disparities in cardiovascular health in Jackson’s racial and ethnic minority communities, and Healthy Start engages child and maternal health issues.

**Demographics**

Total Population, 2010: 49,746

- Female Persons, Percent 2009: 45.9%
- Persons Under 18 Years Old, Percent 2009: 20.2%
